### Atlas of Endourology Superb photography of most endoscopic techniques

 The 'Atlas of Endourology' published by Carol Davila University Press in Bucharest is an exceptional project led by Prof. Petrisor Geavlete. The 720-page atlas contains more than 3,000 illustrations, mostly full-colour photographs that give detailed images of various endoscopic procedures, except laparoscopy.

All endoscopic techniques are illustrated with numerous pictures of outstanding quality. This atlas, which represents an exceptional tool for educational purposes, should be in the library of every teaching department of urology. Not only residents but all urologists would benefit and take pleasure to consult this superb atlas.

 Editor : Petrisor Geavlete

European Urology Today 25

### Professor Pierre Teillac (France)

...Il s'agit indéniablement d'un livre d'enseignement indispensable pour nos jeunes collègues...

### Professor Theo de Reike (Netherlands)

... I was very much impressed by the atlas you composed over the last years of almost all urological abnormalities. I think this book should be available for all residents in Urology in order to learn about the endourological abnormalities and treatments. I will certainly make this book easily available for all our residents in order to study the multitude of urological diseases ...

### Professor John Densted (Canada)

... I had an opportunity to review the book. It is extremely well done and obviously represents a huge amount of work by you and your colleagues. Congratulations ...

**Professor Wiking Manson (Sweden)**

... I had the opportunity to go through your book. It is a truly magnificent piece of art! It has a logical built up, the photos a magnificent and the fact that many photos accompany each case is certainly most valuable and educational. I think that you have covered all aspects of endourological surgery presenting all possible conditions that can occur. This is a book that should be in the hands of every urologist interested in endoscopy and the different procedures ...

**Professor Seth Lerner (USA)**

... I am honored that you were kind enough to share your book with me. It is an extraordinary compilation of cases covering the broad range of urologic endoscopy. I am keeping it on my desk and encouraging our residents to take time to go through the book ...

**Professor Arthur Smith (USA)**

... You can indeed be very proud of your Endourology Atlas. You have managed to illustrate the numerous procedures in both a logical format and at the same time with the most outstanding photographs and diagrams of the Endourologic operation. Those of us who have tried to capture endoscopic pictures during procedures appreciate just how outstanding your photographic techniques have achieved such excellent clarification ...

**Professor Tarik Esen (Turkey)**

... With great interest I right away strolled through the pages and saw how much effort you have put into it. It is the life-time experience of a great surgeon. I can assure you that it will not only help me in the future but also guide our young residents. I feel very privileged to have your book signed by you ...

**Professor Hein van Poppel (Belgium)**

... Congratulations Petrisor. Is a wonderful piece of art and science! ...

**Professor Peter Albers (Germany)**

... These days I received your excellent Atlas of Endourology, Images and Techniques. The book arrived yesterday and I just had the time to roughly screen the images which look perfect to me. I am very grateful that you sent me a copy of this outstanding atlas which certainly will improve our Residency Training since we are

able to show a complete Atlas of images correlated to urological diseases during the training of our residents ...

**Professor Luis Martínez-Piñero (Spain)**

... It is a wonderful atlas and an incredible piece of work. It must have occupied you a lot of your time and lot of effort to complete it. I'm sure that it will be a reference atlas in the field of endourology. Thank you very much for sending me one issue of your book. I will keep it in my library as a jewel.

**Professor Jean de la Rosette (Netherlands)**

... It is a MASTERPIECE!!! My sincere congratulations. Just amazing all these wonderful colour illustrations and I'm confident that this took a lot of time. This superb book will be a true treasure in my library and I truly value that you dedicated a copy of this work to me ...

**Professor Jeroen van Moorselaar (Netherlands)**

... You have collected an enormous amount of very instructive pictures which are very useful for training of our staff and residents. For example we almost never see tuberculosis of the bladder and now we can show the aspect of it. Another example is how to incise an ureterostium etc etc. Again congratulations and thank you very much...

**Professor Michael Marberger (Austria)**

... Thank you for the great book. Congratulation! It is an excellent reference and it now has a prominent place in our library ...

**Professor Christopher Chapple (United Kingdom)**

... thank you very much indeed for the fantastic atlas which I will treasure ...

**Professor Freddy Hamdy (United Kingdom)**

... It is a wonderful piece of work and I would like to congratulate you warmly. I am very grateful that you have sent me a copy, which will be of great benefit to our Department.

**Professor Giorgio Carmignani (Italy)**

I have had the pleasure of finding on my desk your wonderful book. At a first glance it looks as a real masterpiece and I am very happy of having it available for my Residents, my lessons and so on. I will keep it jealously as the precious gift of a dear

friend and an outstanding Colleague.

**Professor Manfred Wirth (Germany)**

... I received it in good conditions and was really delighted by looking through it. Maybe the opportunity arises to have a little chat about it in the near future ...

**Professeur Pascal Rischmann (France)**

... Je vous félicite pour ce magnifique ouvrage qui montre bien l'étendue de votre expérience. Les photos sont remarquables par leur qualité ...

**Professor David Tolley (United Kingdom)**

... It is magnificent and clearly represents a great deal of effort and dedication. It will have pride of place in our library and will be very useful for our trainees ...

**Professor Imre Romics (Hungary)**

... I arrived I went through on your great book: "Atlas of Endourology - Images and Techniques". I have to congratulate for the great job to collect those fabulous endoscopic photos and to publish that superb atlas. It is obvious that this book is a mile stone of endourology ...

**Professor Sava Perovic (Serbia)**

... I have read your atlas from cover to cover, and I must tell you that I am really impressed with your work and the quality of the book. I have not seen such a quality Atlas in the western literature. CONGRATULATION from all of my heart ...

**Professor Jens Rassweiler (Germany)**

This Atlas is an excellent piece of art summarizing the actual state of the art in Urological Endoscopy (Endourology). More than 3500 images of superb quality illustrations demonstrate the endoscopic findings of almost all pathologies and therapeutic scenarios in the Upper and Lower Urinary Tract. This Atlas should be in every Endourological Theater. It is "a must" for every Urologist.

**Professor Henk van der Poel (Netherlands)**

... The book contains a formidable amount of "visual" urology and will serve as a training tool for residents at our department. You and your department should be applauded for these efforts ...

**Professor Francesco Montorsi (Italy)**

... IT IS A FANTASTIC BOOK! VERY BEAUTIFUL! CONGRATULATIONS!! ...

**Professor Paul Abrams (United Kingdom)**

... The book is excellent and, in particular, the illustrations are of exceptional quality. My congratulations ...

**Professor Ziya Kirkali (Turkey)**

... First of all, please allow me to congratulate you for producing such a magnificent book. I know very well how much work you must have put in this fascinating compilation. It really looks superb and will be a very useful tool to learn for the practicing urologists ...

**Professor Frans Debruyne (The Netherland)**

I just received your wonderful 'Atlas of Endourology'. First of all my compliments for this superpublication of wonderful endourological pictures. Sincere congratulations with this performance. I will be able to use many of these pictures for educational instructions and lectures.

**Professor Per-Anders Abrahamsson (Sweden)**

... Indeed it was an honor and pleasure to receive your book recently, i.e. "Atlas of endourology – Images and Techniques". It is a very nice book with fantastic illustrations and photographs. My faculty has already enjoyed overall high quality of this book. My congratulations to you and your co-workers that made a dream come true and finalized this valuable book for educational events but also useful in other parts of urology ...

**Professor Mahesh Desai (India)**

... I really enjoyed going through your book. There are excellent photographs and images and your book is very informative. It will be a prize collection in our library ...

**Professor Börje Ljungberg (Sweden)**

... It was a pleasure to go through the pages with an extremely high number of good endourological photographs. The content of the Atlas covers most of the urological spectra. I congratulate you because this is a outstanding Atlas of unusual and usual cases that is extremely well done. I will use this book for the education of residents, younger colleagues and as a useful dictionary for uncommon findings in the urinary tract. This book is a good example of an excellent contribution to the urological literature ...

**Professor Dmitry Pushkar (Russia)**

Let me express my very deep appreciation to you for sending me this beautiful book. What a tremendous amount of work! It's always a pleasure to receive a note from you and I'm looking forward to seeing you during future international meetings ...

**Professor Andreas Gross (Germany)**

... I did not even thank you for the book you gave me. It is certainly a highlight in my library. I proudly showed it to my team. Books like this may encourage our fellows to work hard in Endourology. And this is our future ...

**Professor Inderbir Gill (USA)**

... And your Atlas is just absolutely FANTASTIC...my sincere congratulations to you for this outstanding piece of work. You should be very proud of this world class work. Congratulations again...!

**Professor Alain le Duc (France)**

... Je viens de parcourir votre Atlas dont la qualité iconographique est remarquable. Toutes mes félicitations! ...

**Professor Richard Williams (U.K.)**

... Thanks so much for the wonderful book. It has spectacular pictures that I will place in our Dept. Library to share with all of our residents and students ...

**Professor Hugh Whitfield (U.K.)**

... I have had a chance to look through in some detail at the magnificent book that you gave me. I can well imagine the enormous amount of work that was involved and I congratulate you on the quality and comprehensiveness of the book. I am sure that generations of future urologists will use your textbook as a source of reference, not only to identify more common pathologies but also to see the unusual and rare ones that can cause us so much confusion ...

**Professor Joachim Thüroff (Germany)**

... I have taken the time to study your "Atlas of Endourology" which indeed is an unbelievable collation of the most excellent and extraordinary endoscopic pictures I have ever seen. Moreover, the reproduction of these pictures and assembly with x-ray findings, histology microscopic photographs and so on is outstanding and a great contribution to urological practice and science. Thank you very much again for giving this treasure of modern endourology to me. Your book is a great contribution to the worldwide urological community for scientific and teaching purposes! ...

Smith***Cap. 47. Ureteroscopy Complications. Petrisor Geavlete.****Extras din interviul realizat pentru Viața Medicală****Eveniment editorial internațional cu participare românească: „Smith’s Textbook of Endourology”**

În luna februarie a anului 2012 a fost lansat pe plan mondial unul dintre cele mai importante *Tratate de Endourologie: Smith's Textbook of Endourology*, 3rd Edition, Arthur D. Smith, MD (Editor-in-Chief), Glenn Preminger (Section Editor), Gopal Badlani (Section Editor), Louis Kavoussi (Section Editor), ISBN: 978-1-4443-3554-5, Hardcover, 1904 pages, Wiley-Blackwell.

Simpla menționare a principalilor editori ai *Tratatului* susține anvergura excepțională a acestei apariții editoriale de referință internațională: **Arthur D. Smith MD**, Chief

Emeritus, Arthur Smith Institute of Urology, North Shore Long Island Jewish Health System, New Hyde Park, NY, USA, **Glenn Preminger**, Professor of Urology, Duke University Medical Center, Durham, NC, USA, **Gopal Badlani**, Professor of Urology, Wake Forest University Baptist Medical Center, Winston-Salem, NC, USA, **Louis Kavoussi**, Chairman of Urology, Arthur Smith Institute of Urology, North Shore Long Island Jewish Health System, New Hyde Park, NY, USA.

Dintre cei peste 100 de autori (contributors) se pot enumera nume de referință ale urologiei actuale: Glenn M. Preminger (USA), Francisco J. B. Sampaio, Jose Gabriel Valdivia-Uria, R. John D'A. Honey, Mahesh R. Desai (India), Elspeth M., Arthur D. Smith (USA), Burak Turna (Turcia), Mantu Gupta, James E. Lingeman (USA), Paul J. Van Cangh (Belgia), Thomas W. Jarrett, Olivier Traxer (Franța), Francis X. Keeley, Manoj Monga (USA), Fernando C. Delvecchio, Demetrius H. Bagley (USA), Michael Grasso (USA), Hans-Goran Tiselius, Peter L. Steinberg, John D. Denstedt (Canada), Andreas Skolarikos (Grecia), Adrian D. Joyce (Anglia), Margaret S. Pearle (USA), Evangelos Liatsikos (Grecia), Jeffrey A. Cadeddu (USA), Stephen Y. Nakada (USA), Alberto Breda, Thomas W. Jarrett, David M. Albala (USA), Jens Rassweiler (Germania), Howard N. Winfield, Rene Sotelo, Pradeep P. Rao, Lee Richstone, Mihir M. Desai (USA), Pilar Laguna (Olanda), Jean de la Rosette (Olanda), Christian G. Chaussy (Germania), Stefan Thuroff (Germania), Hessel Wijkstra (Olanda), Gopal H. Badlani (USA), Alexandre R. Zlotta (Canada), Mostafa M. Elhilali (Canada), Andreas J. Gross (Germania), Rolf Muschter (Germania), Anup Patel (Anglia), Gerald H. Jordan, etc.

În acest context, participarea prof.dr. Petrișor Geavlete, șeful clinicii de urologie Spital clinic de urgență Sfântul Ioan București, cu redactarea unui capitol de bază reprezintă un moment cu foarte puține echivalențe, la acest nivel, indiferent de specialitatea unui medic român. De fapt, invitația de a redacta un astfel de capitol se bazează pe cele peste 1.000 de contribuții științifice la manifestări urologice naționale și internaționale, articole (47 în reviste cotate și indexate ISI) și abstracte, prezentări podium session, postere și video, etc. În special în endourologie, profesorul P.Geavlete are o experiență și contribuții semnificative unanim recunoscute. Revenind la *Tratatul de Endourologie*, redactat sub auspiciile unor extrem de renumiți urologi americani, trebuie menționat în mod special profesorul, Arthur Smith, „părintele endourologiei mondiale”. Trebuie amintit faptul că „*Smith's Textbook of Endourology* is the definitive reference book in the field, addressing every aspect of endourologic procedure including methods of access, operative techniques, complications, and postoperative care”, așa cum apare pe pagina de prezentare a tuturor mijloacelor electronice de prezentare.

Câteva cuvinte despre editura Wiley, una dintre cele mai prestigioase din lume.

In 1807, Charles Wiley, then 25 years old, opened a small printing shop at 6 Reade Street in lower Manhattan, New York City. During the next four years, he worked with other printers, primarily Isaac Riley, printing and publishing law books. In 1812, "C. Wiley, Printer" appeared for the first time on the title pages of several legal works.

When Charles Wiley died in 1826, his son John, then age 18, took over the family business. Over the next 65 years, he continued as a bookseller and publisher, promoting American and European authors. In 1836, he hired George Putnam as a junior partner; together they achieved prominence publishing such works as Herman Melville's *Typee: A Peep at Polynesian Life*, Edgar Allan Poe's *The Raven*, and Nathaniel Hawthorne's *Mosses from an Old Manse*. They published the works of European writers such as Hans Christian Andersen, Victor Hugo, Charles Dickens, and Elizabeth Barrett Browning.

In 1956, the year before the company celebrated its 150th anniversary, W. Bradford Wiley, then 46, succeeded his cousin as President and Chief Executive Officer. The following years were a time of significant expansion and change.

Those years also brought another surge in international growth. Subsidiaries were established in London in 1959 (moving to Chichester in 1968); Australia in 1963; India in 1965; and Toronto, Canada in 1968. In subsequent years, Wiley expanded its global operations to Singapore, Japan, and Germany, and set up sales offices on every continent.

Wiley established [www.wiley.com](http://www.wiley.com) as its corporate Web site in May 1995. The site has evolved considerably since then, and now offers the full range of Wiley's products, brands, and services. Wiley InterScience launched commercially in January 1999 as the company's online platform for scientific, technical, medical, and professional content. The site was replaced in August 2010 by Wiley Online Library ([wileyonlinelibrary.com](http://wileyonlinelibrary.com), described below).

In 2007 Wiley completed the acquisition of the outstanding shares of the U.K.-based Blackwell Publishing (Holdings) Ltd., one of the world's foremost academic and professional publishers. Blackwell's publishing program has been merged with Wiley's global scientific, technical, and medical business to form what is now called Scientific, Technical, Medical, and Scholarly, also known as Wiley-Blackwell, the largest of Wiley's three core businesses. According to the Thomson ISI® 2006 ISI Journal Citation Reports, Wiley and Blackwell combined publish more journals in the Social Science Citation Index than any other publisher.

Wiley extended its global alliance with the National Geographic Society (NGS) to create the Wiley Visualizing series. These introductory higher education texts incorporate the NGS's superb images, maps, and videos, and use a unique visual approach to maximize learning.

**În general vorbind, analizarea unor posibile complicații legate de o anumită procedură chirurgicală este mai puțin atractivă. Vă rog să descrieți relația dintre chirurgia minim invazivă, a ureteroscopiei în special și complicațiile specifice.**

Orice pacient, atunci când dorește să fie tratat cât mai puțin traumatic, dacă se poate „cu laserul” (expresie relativ frecventă a multor bolnavi), alege această alternativă în ideea unei operații mai ușor de suportat, cu reintegrare socială rapidă, fără cicatrici sau toate neajunsurile date de operația clasică. Trebuie să spun că eu am fost crescut de profesorii mei în spiritul chirurgiei clasice! O consider încă o alternativă de mare valoare pentru mulți bolnavi. Pentru noua generație de specialiști urologi, ea trebuie să fie cunoscută cât mai bine posibil. În ciuda mirajului chirurgiei cu monitoare HD, a instrumentelor flexibile digitale, a tehnicilor în fluorescență, a utilizării mediului salin, a chirurgiei laparoscopice robotice, a evoluției către tridimensional, etc., etc., consider că încă nu a venit momentul să considerăm chirurgia clasică arhaică, depășită, total uitată pentru o multitudine de afecțiuni urologice! Pentru că am vorbit de posibile complicații, multe secții și clinici occidentale au încă norocul unor specialiști care știu chirurgie clasică! Nu știu ce se va întâmpla într-un viitor nu prea îndepărtat!

Și acum revenind la întrebarea d-voastră, după o experiență consider semnificativă, pot spune că uneori este greu să definești și să susții în toate cazurile așa zisa minim invazivitate a procedurilor endoscopice. Este adevărat că efectuate corect, cu o tehnică strictă și apelând la măsurile de asigurare a siguranței, tehnicile endoscopice au puține evenimente nedorite. În marea majoritate a cazurilor, chirurgii prezintă reușitele, operațiile deosebite, rezultatele foarte bune, curajul și tehnicitatea, anvergura operațiilor și diversitatea lor. Cred cu convingere că este corect să fie analizate și complicațiile procedurilor. Și mai ales în cazul utilizării endoscopiei și laparoscopiei, alternative de la care se așteaptă de fapt cel mai mult din partea bolnavului!

Complicația posibilă trebuie să fie în primul rând prevenită prin acuratețea abordării, prin abilitate și răbdare, prin luarea tuturor măsurilor de siguranță. Atunci când totuși apare ea trebuie recunoscută la timp și tratată adecvat. Oprirea procedurii și drenajul pot salva o intervenție care devine invazivă! În această idee, consider că apariția unui **Tratat** care să conțină și capitole cu abordarea unor astfel de probleme este extrem de importantă pentru un specialist care se confruntă cu astfel de situații, așa spune din toate punctele de vedere. În final, aș dori să subliniez faptul că prezența printre autorii Tratatului Smiths Textbook of Endourology reprezintă pentru mine o extrem de onorantă poziție, reliefând atât experiența personală recunoscută la acest nivel, cât și activitatea întregii clinici de urologie de la Spitalul clinic de urgență Sfântul Ioan București. Și, nu în ultimul rând, sunt extrem de bucuros pentru că fac parte dintr-o

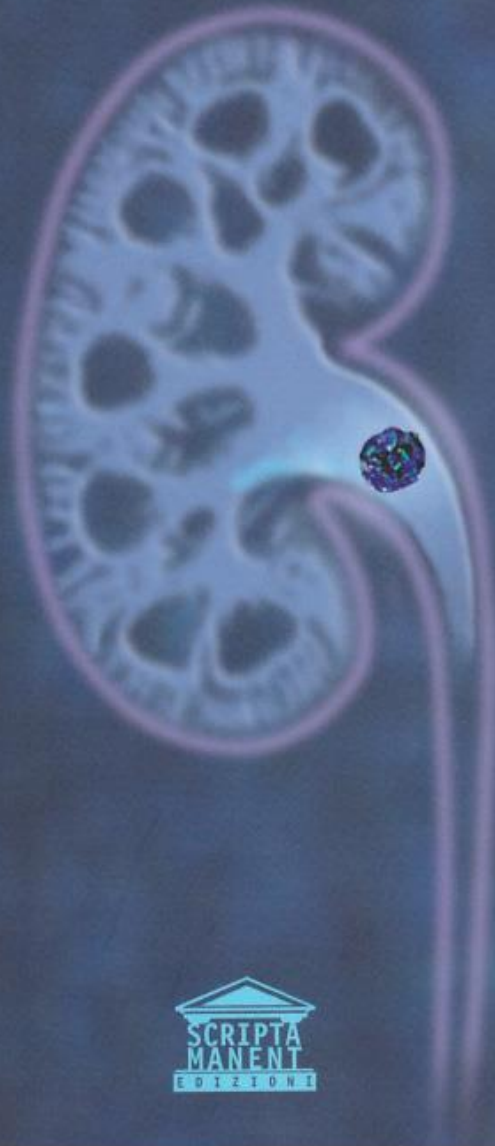

școală de medicină cu tradiție și cu recunoaștere internațională, la care contribuie și alți specialiști de marcă din diverse zone medicale.

**4. The Stone Handbook. EULIS Book, Scripta Manent Editioni, 2013.**

- a. Percutaneous nephrolithotomy: antegrade access to the ureter. Geavlete P, Muțescu R
- b. Percutaneous nephrolithotomy: combined intrarenal surgery (Galdakao Valdivia position) Geavlete P, Muțescu R
- c. Stone treatment in renal anomalies Geavlete P, Geavlete B

Una dintre realizările editoriale internaționale de excepție este reprezentată de editarea a 3 capitole într-un Tratat internațional al European Association of Urology (EAU) Urolithiasis Society (EULIS) într-o editura italiană de referință. Este o nouă recunoaștere, la cel mai înalt nivel, a experienței, expertizei și a prezenței internaționale a unui urolog român.
